

--11. (new) A moving yoke assembly as claimed in claim 10, wherein the third yoke member has means for supporting an object for pivotable movement about a second axis.

--12. (new) A moving yoke assembly as claimed in claim 11, wherein the supporting means is provided on one of the two parts of the third yoke member.

--13. (new) A moving yoke assembly as claimed in claim 11, wherein the object is a light source.

Accs
--14. (new) A moving yoke assembly as claimed in claim 11, wherein the second axis is coaxial with and intersects the first axis in any position of the third yoke member.

--15. (new) A moving yoke assembly as claimed in claim 11, wherein the third yoke member can be arranged in a position relative to the second yoke member such that the second axis is perpendicular to, and coplanar with, the first axis and can be moved from this position through an arcuate path of 90° in order to bring the second axis parallel to, and offset from, the first axis.

--16. (new) A moving yoke assembly as claimed in claim 10, wherein the two parts of the third yoke member are rotatable relative to one another about a third axis.

--17. (new) A moving yoke assembly as claimed in claim 16, wherein the third axis is coaxial with and intersects the first axis in any position of the third yoke member.

--18. (new) A moving yoke assembly according to claim 11, wherein the assembly includes power means for swivelling the second yoke member relative to the first yoke member about said first axis, for sliding the arcuate portion of the third yoke member relative to the arcuate portion of the second yoke member and for pivoting the support means about said second axis.

--19. (new) A moving yoke assembly as claimed in claim 18, wherein the said power means are electric motors.

--20. (new) A moving yoke assembly according to claim 10, wherein the third yoke member includes an arcuate rack engageable with at least one pinion gear which can be rotated to move the third yoke member relative to the second yoke member along said arcuate path.

--21. (new) A moving yoke assembly as claimed in claim 20, wherein the said one part of the third yoke member includes the rack and the other said part is rotatable relative to the said one part.--
